

Microsoft Dynamics 365 and Power Platform Conference

Pre-Day: MAY 26, 2024

MAY 27 - 29, 2024

Portorož, Slovenia, Europe

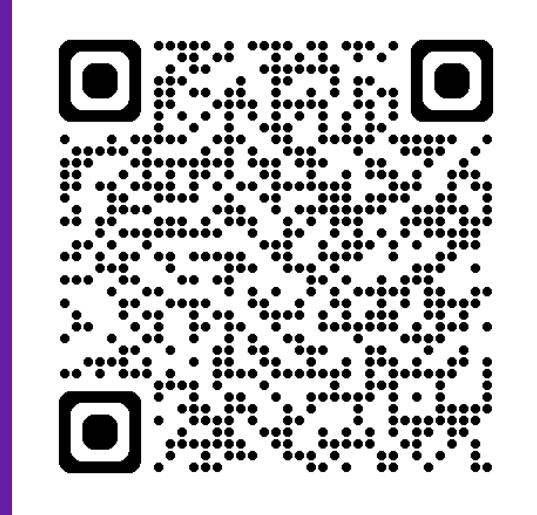

Build your own Copilot with Copilot Studio

LISA CROSBIE
YouTuber & Microsoft MVP
Evangelist
Barhead Solutions, Australia

Build your own Copilot with Copilot Studio

Lisa Crosbie
Evangelist, Barhead Solutions
YouTuber and Microsoft MVP

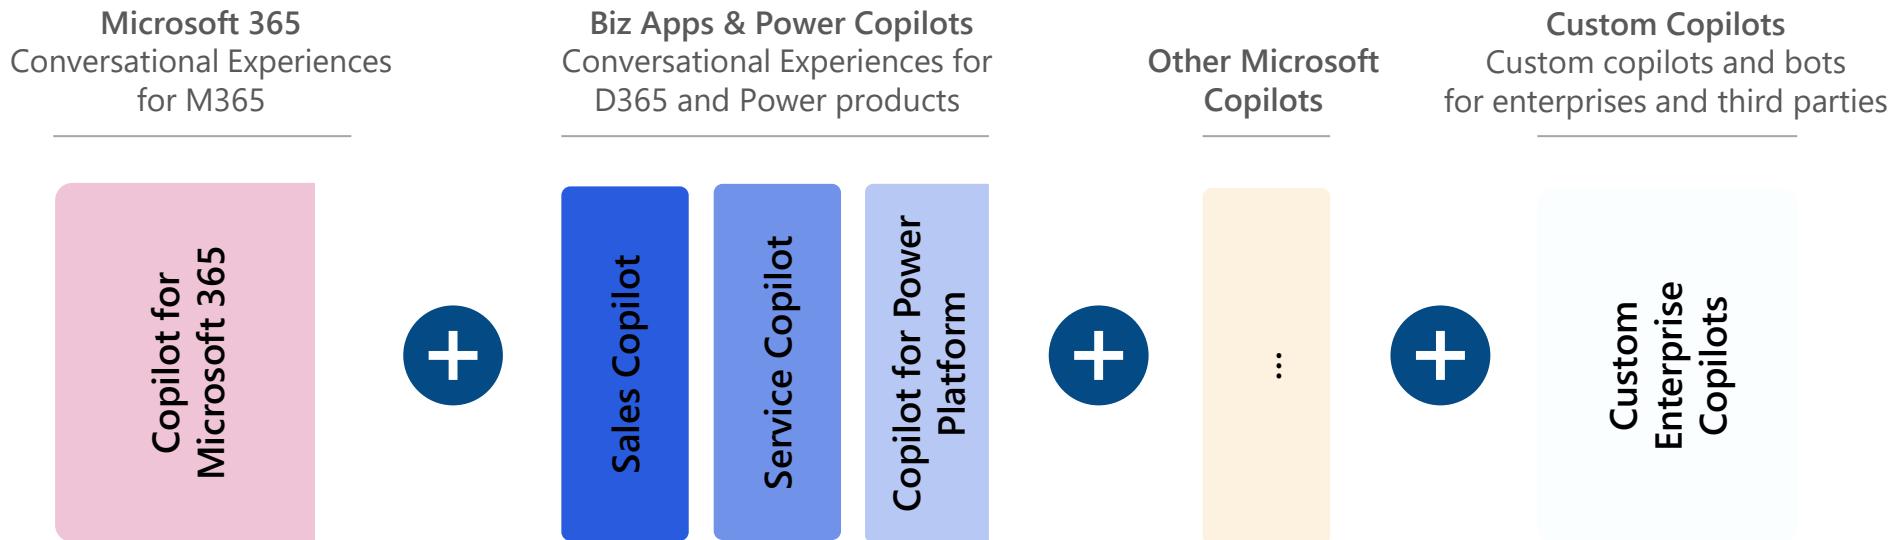

youtube.com/lisacrosbie

What can you do with Copilot Studio?

The magical possibilities

Copilots and Conversational AI

Microsoft Copilot Studio
Extend and customize 1st party copilots | Build custom Copilots

Bot Framework / SDK

Bot Service Channels

Azure AI Studio

Azure Cognitive Services

Power Platform Connectors

AI Builder

What can you do with Copilot Studio?

Internal custom
copilots

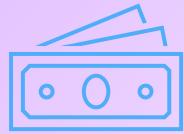

Customer facing
copilots

Extend Copilot for
Microsoft 365

Managing value and risk

Internal copilots
using internal data

Internal copilots
using external data

External copilots
using external data

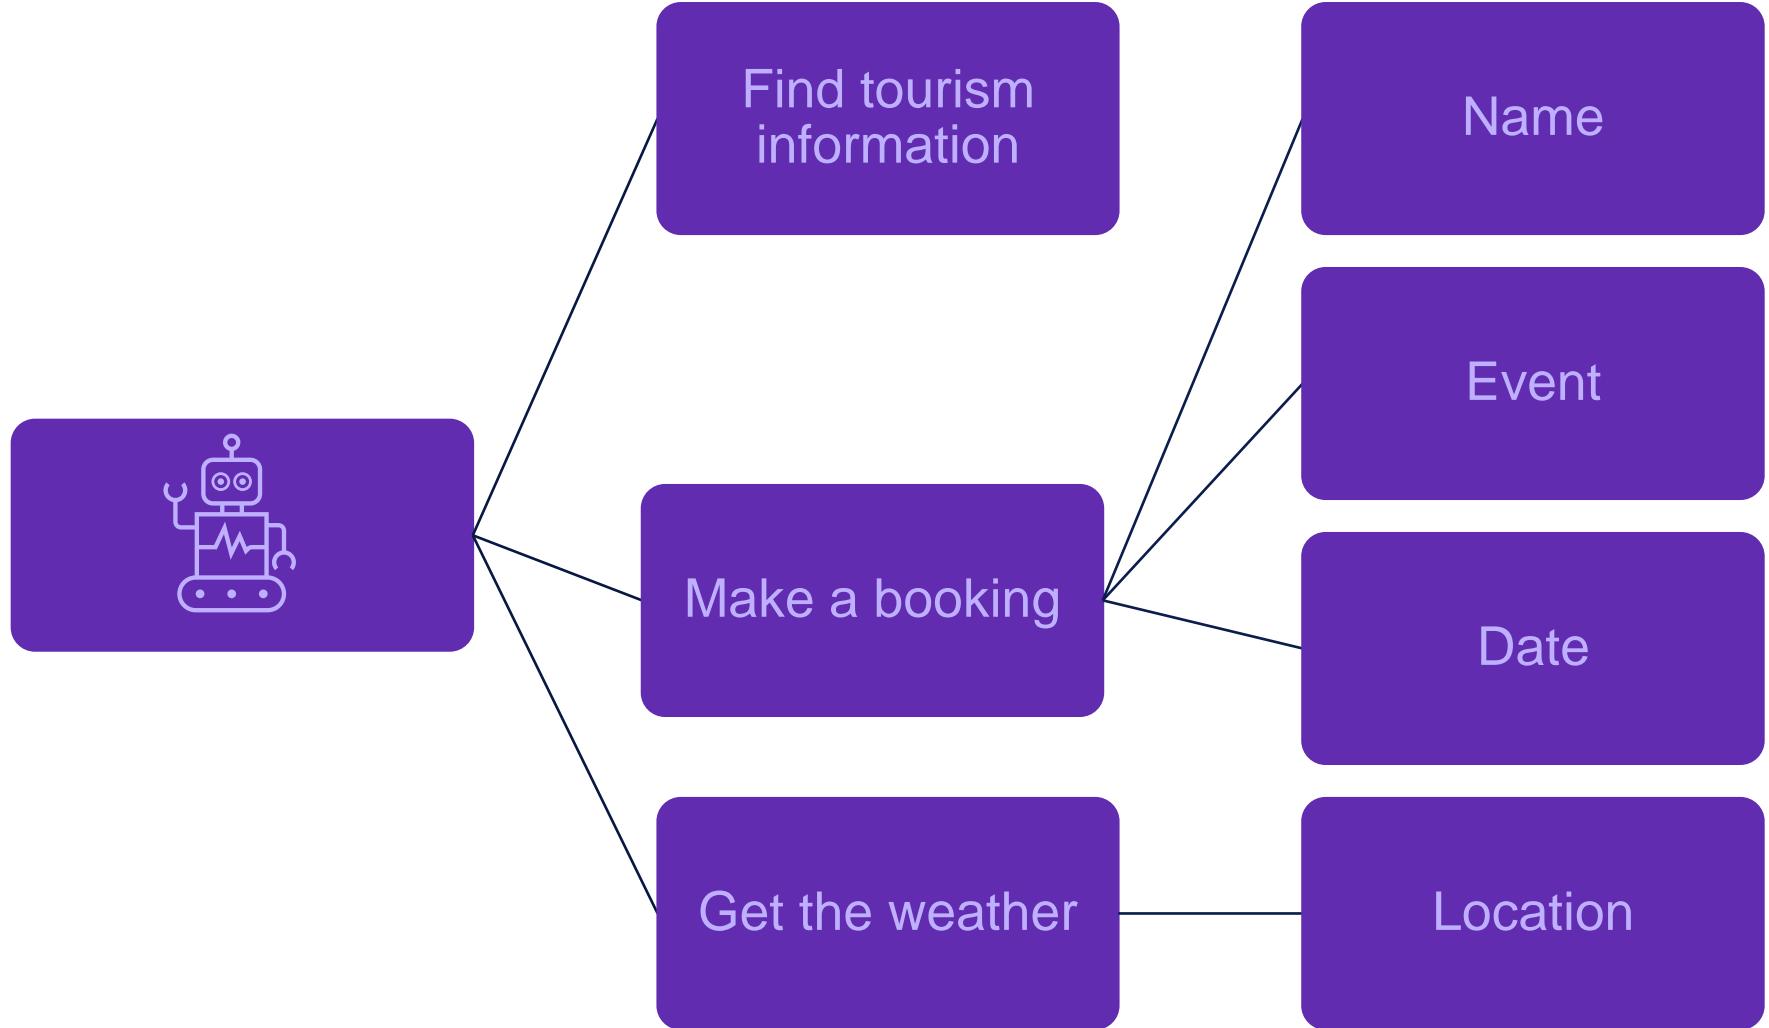

Copilot Studio Capabilities

Creating your
own custom
Copilot

- Chat over knowledge with generative AI
- Create specific topics
- Actions and plugins
- Publish to multiple channels
- Monitor and improve
- Integrate with conversational services

Conversational orchestration

Creating your
own custom
Copilot

Workshop agenda

What you will be doing today

Workshop agenda

Build your own copilot with Copilot Studio

Time	Topic	Format	Duration
9:00	Introduction to Copilot Studio	Presentation	15
9:15	Login and setup	Hands on	15
9:30	Create a copilot using generative answers	Hands on	30
10:00	Building topics	Hands on	30
10:30	Break		15
10:45	Make your Copilot multilingual	Hands on	15
11:00	Publish and test your copilot	Hands on	15
11:15	Extend your Copilot with Generative Actions	Hands on	15
11:30	Extend your copilot using Azure OpenAI	Demonstration	15
11:45	Q&A and Use Cases	Discussion	15

Setup and Login

Setup and Login

Resources: <https://github.com/lisacrosbie/DynamicsMinds24>

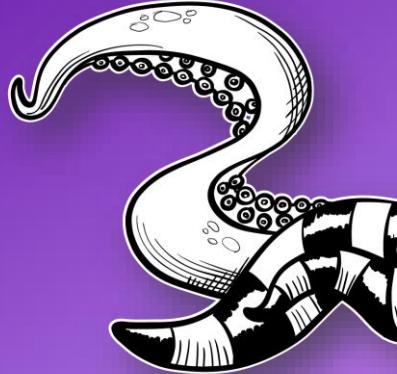

In Private / Incognito Browser

Step 1: Power Apps Developer Plan

- <https://aka.ms/powerappsdeveloperplan>
- Start Free – using the login provided (or your own login if you already have one)
- Password: DynamicsMinds24

Step 2: Copilot Studio Trial

- <https://copilotstudio.microsoft.com>
- Switch to your developer environment in the top right corner

Build your Copilot

Extend with Azure OpenAI on your data

Demonstration

Deployments

Deployments provide endpoints to the Azure OpenAI base models, or your fine-tuned models, configured with settings to meet your needs, including the content moderation model, version handling, and deployment size. From this page, you can view your deployments, edit them, and create new deployments.

+ Create new deployment |  Edit deployment  Delete deployment  Column options  Refresh  Open in Playground

I am going to New York for 3 days, my budget is \$300 per night and I need something that sleeps 3 people. I would like to be near the major tourist attractions

Sure, I can help you with that. Here are a few options for your stay:

- DoubleTree by Hilton Metropolitan New York:** This hotel is located in Midtown Manhattan, close to many attractions like Times Square, Central Park and Rockefeller Centre. The price is around \$260 per night for a room that sleeps 3 people.
- Hyatt Place New York Midtown South:** This hotel is also located in Midtown Manhattan and it's very close to the Empire State Building and Broadway. A room for 3 people is around \$280 per night.
- Courtyard by Marriott New York Manhattan/Times Square:** This hotel is located in the heart of Times Square and is very close to many attractions. The price for a room that sleeps 3 people is approximately \$275 per night.

I recommend booking as soon as possible as prices can fluctuate. Also, please make sure to check the hotels' COVID-19 protocols and safety measures.

I am going to New York for 3 days, my budget is \$300 per night and I need something that sleeps 3 people. I would like to be near the major tourist attractions

Sure, I can help you with that. Here are a few options for your stay:

- DoubleTree by Hilton Metropolitan New York:** This hotel is located in Midtown Manhattan, close to many attractions like Times Square, Central Park and Rockefeller Centre. The price is around \$260 per night for a room that sleeps 3 people.
- Hyatt Place New York Midtown South:** This hotel is also located in Midtown Manhattan and it's very close to the Empire State Building and Broadway. A room for 3 people is around \$280 per night.
- Courtyard by Marriott New York Manhattan/Times Square:** This hotel is located in the heart of Times Square and is very close to many attractions. The price for a room that sleeps 3 people is approximately \$275 per night.

I recommend booking as soon as possible as prices can fluctuate. Also, please make sure to check the hotels' COVID-19 protocols and safety measures.

- Sure, I can help you with that. Here are some recommendations:
1. **DoubleTree by Hilton New York Manhattan/Times Square**: Located in Times Square, Central Park is just a short walk away. It's a great option for families or groups looking for a comfortable stay.
 2. **Hyatt Place New York Manhattan/Times Square**: This hotel is located in the heart of Times Square and is very close to many attractions. The price for a room that sleeps 3 people is approximately \$275 per night.
 3. **Courtyard by Marriott New York Manhattan/Times Square**: This hotel is located in the heart of Times Square and is very close to many attractions. The price for a room that sleeps 3 people is approximately \$275 per night.

I recommend booking as soon as possible as prices can fluctuate. Also, please make sure to check the hotels' COVID-19 protocols and safety measures.

I am going to New York for 3 days, my budget is \$300 per night and I need something that sleeps 3 people. I would like to be near the major tourist attractions

Based on the retrieved documents, the "Secret Point Motel" could be a suitable option for your stay in New York. It is ideally located on the main commercial artery of the city, in the heart of New York. It is also a few minutes away from Time's Square and the historic center of the city, as well as other places of interest that make New York one of America's most attractive and cosmopolitan cities¹. However, the documents do not provide information about the price per night or the number of people it can accommodate. You may need to contact the motel directly or check their website for this information.

I am travelling to New York on my own, I enjoy art and theatre, where should I stay and what should I see while I'm there

Oh, New York! The city that never sleeps! It's a fantastic place for art and theatre lovers like you. Let's find the perfect spot for your stay and some must-see attractions.

For your accommodation, I'd recommend the "Secret Point Motel" ¹. It's ideally located in the heart of New York, right on the city's main commercial artery. You'll be just a few minutes away from Times Square and the historic city center. Plus, it's a boutique hotel, which often means unique, artistic decor and a more personalized experience.

As for what to see, you're in luck! New York is home to a plethora of art and theatre venues. Since you're staying near Times Square, you'll be right in the heart of Broadway. Be sure to catch a show or two while you're there.

For art, the Museum of Modern Art (MoMA) is a must-visit. It's one of the largest and most influential museums of modern art in the world. You might also want to check out the Metropolitan Museum of Art, which houses over two million works in its two-million-square-foot building.

And don't forget about Central Park! It's a great place to relax and people-watch after a busy day of sightseeing. Enjoy your trip! New York is truly a city like no other.

What Broadway shows should I see on Valentine's Day?

I'm sorry, but I can't provide real-time information or recommendations for specific dates like Valentine's Day as I don't have the ability to browse the internet or access current data. However, Broadway is known for its wide range of shows, from timeless classics to exciting new productions. Some popular romantic-themed shows that have graced Broadway stages in the past include "Phantom of the Opera", "West Side Story", and "Moulin Rouge! The Musical". I'd recommend checking the official Broadway website or contacting the theatre box office for the most up-to-date show schedules and ticket availability. Enjoy your trip to New York and your Broadway experience!

I'm sorry, but I can't provide real-time information or recommendations for specific dates like Valentine's Day as I don't have the ability to browse the internet or access current data. However, Broadway is known for its wide range of shows, from timeless classics to exciting new productions. Some popular romantic-themed shows that have graced Broadway stages in the past include "Phantom of the Opera", "West Side Story", and "Moulin Rouge! The Musical". I'd recommend checking the official Broadway website or contacting the theatre box office for the most up-to-date show schedules and ticket availability. Enjoy your trip to New York and your Broadway experience!

The screenshot shows the Copilot Studio interface with a 'Topics & Plugins' sidebar on the left. A 'Test copilot' window is open, displaying a message from 'Travel Copilot'. The main area shows a flowchart titled 'Conversational boosting' under 'Topics'. The flowchart starts with a 'Trigger' node ('On Unknown Intent') which leads to a 'Create generative answers' node. This node has an 'Input' field set to '(x) Activity.Text string' and a 'Data sources' field. From this node, two paths emerge: one leading to a 'Condition' node ('Answer string > is not Blank') and another leading to 'All other conditions'. The 'Condition' node has a 'New condition' button. Finally, both paths converge at an 'End current topic' node.

The screenshot shows the Copilot Studio interface with a focus on a 'Topics & Plugins' item in the sidebar. The main area displays a flowchart titled 'Conversational boosting'. The flow starts with a 'Trigger' node ('On Unknown Intent') which points to a 'Create generative answers' node. This node has an 'Input' field set to '(x) Activity.Text string' and a 'Data sources' field. From this node, two paths emerge: one leading to a 'Condition' node and another to 'All other conditions'. The 'Condition' node contains a single condition: '(x) Answer string > is not Blank'. Below this is a 'New condition' button. The 'All other conditions' path leads to an 'End current topic' node, which then loops back to the 'Create generative answers' node. On the left side of the flowchart, there is a vertical toolbar with icons for copy, paste, search, refresh, and other operations. A small preview window on the left shows a message from the 'Travel Copilot' chatbot. The top right corner shows connection properties for Azure OpenAI, including deployment (lc-gpt4-32), API version (2023-06-01-preview), maximum tokens (800), temperature (0), top P (1), and stop sequence (Manual input). A note at the bottom of the connection properties section says: 'To add items in bulk, paste in line-separated items or use Shift+Enter to create line separation'.

I am travelling to New York on my own, I enjoy art and theatre, where should I stay and what should I see while I'm there

Just now

Based on the information provided, I would recommend the "Secret Point Motel" for your stay in New York. This boutique hotel is ideally located on the main commercial artery of the city, right in the heart of New York. It's just a few minutes away from Times Square and the historic center of the city, which are both must-see attractions for art and theatre lovers [1].

As for what to see, New York is a city brimming with art and theatre. Times Square is home to Broadway, where you can catch a variety of shows, from long-running classics to new hits. The historic center of the city also offers a wealth of art galleries, museums, and cultural landmarks to explore [2].

Enjoy your stay in New York and have a wonderful time immersing yourself in the vibrant art and theatre scene!

Hide copilot

The screenshot displays the Copilot Studio interface. On the left, a sidebar lists various features like Copilots, Overview, Generative AI, Topics & Plugins, Entities, Analytics, Publish, Extend Microsoft Copilot (preview), and Settings. The main area is divided into two sections: a 'Test copilot' window on the left and a 'Topics > Conversational boosting' flowchart editor on the right.

The 'Test copilot' window shows a simulated conversation. A user message asks for recommendations in New York. The bot responds with a recommendation for 'Secret Point Motel' and provides information about Broadway and the city's art scene. It also includes links to 'Citation-1' and 'Citation-2'. Below the messages is a 'Type your message' input field with a send button.

The 'Topics > Conversational boosting' section shows a flowchart. It starts with a 'Trigger' node ('On Unknown Intent') connected to a 'Create generative answers' node. This node has an 'Input' field set to '(x) Activity.Text string' and a 'Data sources' field set to 'Public websites (1)'. From this node, the flow splits into two parallel paths. One path leads to a 'Condition' node with the condition '(x) Answer string is not Blank'. The other path leads to an 'All other conditions' node. Both lead to a final 'End current topic' node.

On the right side of the editor, there are tabs for 'Comments', 'Topic checker', 'Test copilot', 'Save', and 'Details'. Below the editor, there are sections for 'Data source', 'Data sources', 'Search public data', 'Public websites', 'SharePoint', 'Azure OpenAI Services on your data', 'Custom data', and 'Connection properties'.

I am travelling to New York on my own, I enjoy art and theatre, where should I stay and what should I see while I'm there

Just now

Based on the information provided, I would recommend the "Secret Point Motel" for your stay in New York. This boutique hotel is ideally located on the main commercial artery of the city, right in the heart of New York. It's just a few minutes away from Times Square and the historic center of the city, which are both must-see attractions for art and theatre lovers [1].

As for what to see, New York is a city brimming with art and theatre. Times Square is home to Broadway, where you can catch a variety of shows, from long-running classics to new hits. The historic center of the city also offers a wealth of art galleries, museums, and cultural landmarks to explore [2].

Enjoy your stay in New York and have a wonderful time immersing yourself in the vibrant art and theatre scene!

```

graph TD
    Trigger[Trigger] --> Create[Create generative answers]
    Create --> Condition[Condition]
    Condition --> End[End current topic]
    Condition --> AllOther[All other conditions]
    AllOther --> End
  
```

The diagram illustrates the flow of a generative answer. It starts with a **Trigger** (On Unknown Intent) which activates a **Create generative answers** block. This block defines the **Input** as `{x} Activity.Text string` and specifies a **Data sources** section containing a single entry for **Public websites (1)**. The flow then branches into two paths: one leading to a **Condition** block (Answer string > is not Blank) and another leading to a **All other conditions** block. Both of these lead to the final step, **End current topic**.

the lifelong love story of Allie and Noah, set to a score by Ingrid Michaelson. [1]

3. Back to the Future: Head back to 1985 and 1955 with Marty McFly on his quest to make sure his parents meet, fall in love, and assure his own existence! This musical is based on the hit film of the same name. [1]

4. & Juliet: This new musical flips the script on Shakespeare's classic love story, imagining what would happen if Juliet got a second chance at life and love. Featuring hit songs by Max Martin, including "Since U Been Gone" and "Roar." [1]

5. Hadestown: Intertwining two mythical tales, Hadestown tells the story of young dreamers Orpheus and Eurydice, as well as husband and wife Hades and Persephone. It's a haunting and hopeful musical. [1]

6. Aladdin: Based on the hit film, Aladdin is a shining, shimmering, and splendid way to spend Valentine's Day. Follow the enterprising title character as he falls in love with Princess Jasmine. [1]

Please note that availability may vary, so it's recommended to check for ticket availability and showtimes. Enjoy your Valentine's Day! [1]

The screenshot shows the Copilot Studio interface with a 'Test copilot' window open. The window displays a list of Broadway musicals and a note about availability. Below the list is a 'Type your message' input field. The main workspace shows a flowchart for conversational boosting. The flow starts with a 'Trigger' node ('On Unknown Intent') which points to a 'Create generative answers' node. This node has an 'Input' field set to '(x) Activity.Text string' and a 'Data sources' field set to 'Public websites (1)'. From this node, the flow splits into two parallel paths. One path leads to a 'Condition' node with the condition '(x) Answer string is not Blank'. The other path leads to an 'All other conditions' node. Both lead to a final 'End current topic' node. On the right side of the workspace, there are sections for 'Data source', 'Public websites', 'SharePoint', 'Azure OpenAI Services on your data', and 'Custom data'.

SHOW GUIDES

The Best Broadway Shows to Celebrate Valentine's Day

Last updated Jan. 17, 2024 by Broadway.com Staff

Courtney Reed and Casey Cott in *Moulin Rouge! The Musical*
(Photo: Matthew Murphy and Evan Zimmerman)

Love is in the air! [Tickets to a Broadway show](#) is a fantastic way to celebrate Valentine's Day. Whether you're looking for date night plans or the perfect gift idea for your sweetie, we've got shows that any couple would love to see.

What You'll Learn About

- [Moulin Rouge! The Musical](#)
- [The Notebook](#)
- [Back to the Future](#)
- [& Juliet](#)
- [Hadestown](#)
- [Aladdin](#)

The screenshot shows the Microsoft Copilot interface for creating generative answers. On the left, a sidebar includes options like Copilots, Overview, Generative AI, Topics & Plugins (selected), Entities, Analytics, Publish, Extend Microsoft Copilot (preview), and Settings. The main area has tabs for Chat and Topics. In the Chat tab, a message discusses Broadway musicals. The Topics tab shows a flowchart for generating answers:

```
graph TD; Trigger[Trigger] --> Create[Create generative answers]; Create --> Condition[Condition]; Condition --> End[End current topic];
```

- Trigger:** On Unknown Intent
- Create generative answers:** Input: Activity.Text string, Data sources: Public websites (1)
- Condition:** Answer string is not Blank
- End current topic:**

On the right, there are sections for Data source, Search public data, SharePoint, and Azure OpenAI Services on your data.

A stylized illustration of an underwater environment. The background consists of light gray rock formations and coral reefs. Various sea creatures are scattered throughout: a purple seahorse, several small blue fish, a black starfish, a purple jellyfish, and a school of small purple fish swimming in the distance. The overall aesthetic is minimalist and artistic.
